Authorised by directors but not contracted	92 596 000	38 825 343	92 596 000	12 761 000	
	92 596 000	38 825 343	92 596 000	12 761 000	

The capital expenditure is to be financed out of the Group's own resources and existing facilities.

#### 5. Segmental Reporting

The distinct operating segments for the Group are shown in the table below:

Reportable segments	Operations
Lager Beer division	Manufacture and distribution of lager beer (malt and sorghum based clear beers).
Sparkling Beverages division	Manufacture and distribution of carbonated soft drinks and alternative non-alcoholic beverages
Sorghum Beer division	Manufacture and distribution of sorghum based opaque beer.
Wines and Spirits	Manufacture and distribution of wines and spirits.

Other operations include barley, sorghum malting and provision of transport services which are functional departments for the above mentioned divisions.

None of these segments met the quantitative thresholds for reportable segments in 2023 nor 2022.

#### Information about reportable segments

Information related to each reportable segment is set out below. Segment operating income is used to measure performance because management believes that this information is the most relevant in evaluating the results of the respective segments relative to other entities that operate in the same industries.

There are varying levels of integration between the Lagers, Sparkling Beverages, and Sorghum segments. This integration includes shared primary and secondary distribution services and facilities. The Group has a centralised treasury function.

The accounting policies of the reportable segments are the same as the Group's accounting policies. Segment operating income represents segment income before the allocation of central administration costs. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance.

No single customer contributed 10% or more to the Group's or individual segment's revenue.

<sup>\*</sup> In the current year, short term lease liability has been reclassified to trade and other payables. In 2022 short-term lease liability was included in long term lease liabilities.

# 6. Corporate Information

Delta Corporation Limited (the Company) is a public limited company which is listed on the Zimbabwe Stock Exchange and incorporated and domiciled in Zimbabwe. The principal activities of the Company and its subsidiaries (the Group) include the manufacture and distribution of cold beverages and related value-added activities.

# 7. Statement of Compliance

The abridged consolidated financial information of the Group has been compiled adopting principles from International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), the International Financial Reporting Interpretations Committee (IFRIC) and the Companies and Other Entities Act (Chapter 24:31) and the Zimbabwe Stock Exchange regulations.

#### 7. Statement of Compliance (continued)

The Directors note that there are varied interpretations and applications of legislation and exchange control directives governing the current multi-currency framework in Zimbabwe and in particular the statutory instruments relating to the pricing of goods in foreign currency and the exchange rates thereto. These interpretations have a bearing on the application of International Accounting Standard (IAS 21) – The effects of Changes in Foreign Exchange Rates with respect to converting domestic transactions conducted in foreign currencies

#### 8. Significant Accounting Policies

The abridged consolidated financial information has been prepared in accordance with the accounting policies adopted in the Group's last annual financial statements and applicable amendments to IFRS.

#### 9. Basis of Preparation

The abridged consolidated financial information is presented in Zimbabwe dollars. They have been prepared under the inflation-adjusted accounting basis in line with the provisions of International Accounting Standard 29 "Financial Reporting in Hyperinflationary Economies" (IAS 29), hence the historical cost information has been restated for changes in the general purchasing power of the Zimbabwe Dollar and appropriate adjustments and reclassifications have been made. Accordingly, the inflation-adjusted financial statements represent the primary financial statements of the Company and the Group. The historical cost financial statements have been provided by way of supplementary information.

IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy be stated in terms of a measuring unit current at the balance sheet date and that corresponding figures for previous periods be stated in the same terms as the latest balance sheet date. The restatement has been calculated by means of conversion factors derived from the consumer price index (CPI) prepared by the Zimbabwe Central Statistical Office up to 31 January 2023.

On the 3rd of March 2023, government issued SI 27 of 2023, which defined the term "rate of inflation" and introduced a new inflation rate measurement method. Consequently, ZIMSTATS stopped reporting ZW\$ inflation and CPI figures and only released blended CPI figures. This change created a challenge for the Group, as it had been using the ZW\$ CPI for reporting inflation adjusted historical figures.

The use of indices issued by Zimstats made comparability possible for business in Zimbabwe. While it is preferable for all companies using the ZW\$ functional currency to use the same index, the standard provides that each business may determine an index for the purpose of compliance with IFRS in the absence of official statistics.

In the absence of a reliable, independently determined index, the Group had to consider various methodologies of determining the appropriate indices for the month of February and March. This included the use of independent experts as well as consideration of the movements in the exchange rates which have a bearing on inflation developments. As an additional step, the Group compared the data used in publications issued by recognised institutions. The Group has concluded that indices used for Hyperinflationary accounting are reasonable. The determination of the indices is a significant area of judgement. The timing of the resolution of the uncertainty regarding the CPI is unknown.

The conversion factors used to restate the financial statements are as follows:

	Index	Factor
31 March 2023	14 500,9	1,00
31 March 2022	4 766,1	3,04
31 March 2021	2 759,8	5,25
Average CPI for the 12 months to:		
Average March 2023	11 618,1	1,37
Average March 2022	3 582,9	4,17

IAS 29 discourages the publication of historical cost results as the inflation-adjusted results are the primary records. However, the historical cost results are included as supplementary information to allow for comparability. See note 14 for the CPI sensitivity analysis.

# 10. Currency Changes and Exchange Rates

The financial statements are presented in the ZW\$ the transactional, functional and reporting currency.

The Government of Zimbabwe has since 2020 promulgated legislative changes, which have since been consolidated into the Finance Acts, and which permit the use of foreign currencies for domestic transactions. The Monetary Authorities introduced the Foreign Exchange Auction Trading System in June 2020 and the Willing Buyer Willing Seller framework in 2022. The Zimbabwe businesses have relied on foreign currency obtained through the sale of products on the domestic market in line with the multi-currency framework. There have been significant gaps between the auction exchange rates and the rates reflected by comparing the market prices of goods and services quoted in alternative currencies. International Accounting Standard 21 (IAS21) – The effects of Changes in Foreign Exchange Rates require an entity to determine the functional currency based on the economic environment in which it operates. The entity does not believe that the official exchange rates prevailing during the period under review were, at all times, fairly reflective of the currency exchangeability and as such, has used an estimation process, which is allowed by IAS 21. Therefore, the exchange rate applied in translating foreign currency transactions to the reporting currency and as the spot rate used in translating other foreign balances has at times differed from the official rates.

The Institute of Chartered Accountants of Zimbabwe (ICAZ) issued an interpretation guidance titled Lack of Exchangeability – Interpretation of IAS 21, The Effects of Changes in Foreign exchange rates in May 2022. Our interpretation of this guidance confirms that the treatment that the Group has applied in estimating an exchange rate is acceptable.

The Directors have concluded that it is appropriate to report in the ZW\$ currency. The Directors would however like to advise users to exercise caution in the use of the abridged consolidated inflation-adjusted financial information in relation to the reporting currency and conversion to comparative currencies.

# Application of IAS 21 - The Effects of Changes in Foreign Exchange Rates

The Directors and Management differ with the professional conclusion of our auditors on the application of IAS21. The independent auditors Ernst & Young Chartered Accountants (Zimbabwe) have, since the 2022 reporting period and with respect to the current year issued an adverse audit opinion as they believe that the determination of an estimate exchange rate is not compliant with International Financial Reporting Standards ("IFRS"). The auditors believe the bank rate (either the auction exchange rate or willing buyer willing seller exchange rate) is the appropriate spot exchange rate that is, observable and accessible for immediate delivery through a legal exchange mechanism. This is contrary to the circumstances applicable to the entity as indicated

There are varying views on the matter particularly in the absence of definitive guidance from the Public Accountants and Auditors Board.

#### for the year ended 31 March 2023

#### Supplementary Information (continued)

#### 11. Legacy Foreign Liabilities

The Group extinguished all legacy foreign liabilities as at 31 March 2023 (2022: US\$10,7 million), being those amounts that were due and payable on 22 February 2019 when the authorities promulgated SI33/2019 which introduced the ZW\$ currency as distinct from the U\$\$, as the functional currency. The Group had registered these liabilities with the Reserve Bank of Zimbabwe and transferred to the Reserve Bank of Zimbabwe the ZW\$ equivalent of the foreign liabilities based on the U\$\$/ZW\$ 1:1 exchange rate in line with Directives RU102/2019 and RU28/2019 and as agreed with the Reserve Bank of Zimbabwe. Both the foreign liabilities and the deposits were accounted for at the closing exchange rates and the cash cover deposits at the Reserve Bank of Zimbabwe were disclosed as a financial asset in prior years. The following exchange losses and revaluation gains have been recorded in the statement of profit or loss.

#### **Movement in Legacy Debt**

	INFLATION	ADJUSTED	HISTORIC COST		
	2023 ZW\$ 000	2022 ZW\$ 000	2023 ZW\$ 000	2022 ZW\$ 000	
Exchange losses on revaluation of legacy debt Exchange gains on revaluation	(5 169 176)	(4 137 301)	(5 169 176)	(1 359 836)	
of financial asset	3 942 119	2 597 534	3 942 119	853 750	
	(1 227 057)	(1 539 767)	(1 227 057)	( 506 086)	

An amount of ZW\$ 1,2 billion was recorded as an exchange loss relating to the legacy foreign liabilities held during the year. In compliance with IFRS, the deposit at the Reserve Bank of Zimbabwe represented a commitment to pay an equivalent value in US\$ and was therefore treated as a financial derivative translated at the closing rate and discounted to Net Present Value.

The legacy debts were transferred from the Reserve Bank of Zimbabwe to the Government of Zimbabwe under the Finance Act No. 7 of 2021. At the end of the year, the Government issued United States Dollar denominated treasury bills in settlement of the legacy debts. As such, the asset presented on the financial statements is the treasury bid component related to legacy debts.

# 13. Contingencies

# 13.1 Uncertain Tax Positions

There have been significant currency changes in Zimbabwe since 2018. These changes create some uncertainties in the treatment of transactions for tax purposes due to the absence of clear guidelines and transitional measures. There are further complications arising from the wording of the legislation in relation to the currency of settlement of certain taxes which give rise to interpretations that may differ with those of the tax authorities, thereby creating uncertainties in tax positions.

The Zimbabwe Revenue Authority (ZIMRA) has made some assessments which imply the rejection of the Zimbabwe Dollar as legal tender for the settlement of tax obligations that they deem were payable in foreign currency. These assessments are being objected to and challenged through the courts. Similarly, Natbrew Zambia is challenging an assessment by the Zambia Revenue Authority relating to transfer pricing positions on royalties and group charges for periods prior to the acquisition of the entity. The group anticipates a favourable determination on the tax matters.

# 14. CPI Sensitivity

The Group considered various methodologies in determining the ZW\$ inflation indices to use for preparation of inflation adjusted accounts. The methodologies applied were consistent with those required by International Accounting Standard 29 (IAS29 - Financial Reporting in Hyperinflationary Economies). In determining the indices, the group considered the movement in the exchange rates and engaged an expert in determining the basket of goods in line with the methodologies previously used by ZIMSTATS. Our assessment recognises the invariable challenges in the methodologies applied as the basket of goods is impacted by multiple exchange rates. The analysis below seeks to demonstrate the sensitivity of the indice used in comparison to indices derived using other methodologies.

IAS 29 provides that each business may determine an index for the purpose of compliance with IFRS. The resultant CPIs were based on the scenarios as disclosed below:

# A - Consideration of Interbank Exchange rate in the determination of Indices

This methodology assumed the use of the movement in the interbank exchange rate.

# B - Consideration of Internal Exchange rate in the determination of Indices

As communicated per note 9, the Group uses an internally determined exchange rate. This methodology assumed the use of the movement in the internal exchange rate.

# C - Use of an Independent Expert

Based on the pricing of general goods independently determined by external experts and data generated by reputable research institutions. The estimates are based on a basket of goods impacted by the different economic fundamentals. The basket of goods and weighting thereof follows the bases used by ZIMSTATS and has been considered as the best estimate of the reflection of the National Consumer Price Index and hence has been adopted for reporting.

#### **Supplementary Information (continued)**

#### 14. CPI Sensitivity (continued)

#### Sensitivity Analysis

Scenario	С	A		В	
	*Index Based on expert repopulated basket	Index based	conversion		***Impact of change in the conversion factor (%)
31 March 2023 Estimated Index	14 500,9	16 258,4	12%	15 892,7	10%
Average March 2023	11 618,1	11 777,5	1%	11 827,1	2%

- The Group adopted the use of the expert derived index
- \*\* Impact of change in the conversion factor if the Index based on the official exchange rate is used instead of the expert-derived index
- \*\*\* Impact of change in the conversion factor if the Index based on the internal exchange rate is used instead of the expert-derived index

#### 15. Going Concern

The Directors have assessed the ability of the Group to continue as a going concern and believe that the preparation of these financial statements on a going concern basis is appropriate. The Zimbabwe business is witnessing a significant recovery despite operating in an unstable macro-economic environment. The key factors relate to an unstable currency, high inflation, a turbid political environment, fluid policy framework, and the impacts of global conflicts.

Consumer spending continues to be strongly driven by mining and infrastructure development projects. The business has been able to grow volume across all business units during the period. Management constantly reviews the business risks and the business continuity plans in order to maintain operations at sustainable levels; competitive product pricing, cost reduction initiatives, and adapting sourcing strategies as necessary. United National Breweries (UNB) is on a recovery path from the residual effects of COVID-19 with UNB almost achieving breakeven volumes and cash flows. Management will continue to realign the marketing, route to market, and business operations in general, for sustainability.

Natbrew Zambia has faced funding challenges arising from cumulative financial losses and loss of volume over the years. Management is implementing a business recovery plan over the next 5 years. The significant recovery of volume in F23 demonstrates the positive effects of this turnaround plan.

#### 16. Impairment Assessment of Assets

Management undertakes the requisite assessments for possible impairment of individual asset or clusters of assets at each reporting period. There were no significant asset impairments in the prior year and current year.

#### 17. Subsequent Events

There are no subsequent events to report.

# 18. External Auditor's Opinion

The Group's consolidated inflation-adjusted financial information from which these abridged financial statements have been extracted, were audited by the Group's external auditors, Ernst & Young Chartered Accountants (Zimbabwe). The auditors have issued an adverse opinion as a result of non-compliance with International Financial Reporting Standards; IAS21 - The Effects of Changes in Foreign Exchange Rates; IAS 8 - Accounting Polices, Changes in Accounting Estimates and Errors; IAS 16 - Property, Plant and Equipment and the consequential impact of IAS29 - Financial Reporting in Hyperinflationary Economies. The auditor's opinion on the Group's consolidated inflation-adjusted financial statements is available for inspection at the Company's registered office.

The engagement partner responsible for this audit is Mr. Walter Mupanguri (PAAB Practicing Certificate Number 367).

# Chairman's Letter to Shareholders

# Dear Shareholder

# **Environmental Overview**

The Zimbabwean economy recorded modest growth in the reporting period, which was driven by both formal and informal mining, government infrastructure projects and diaspora remittances. Though there was lower than expected maize output, other agricultural products such as wheat recorded growth, contributing towards the economic growth. The economy was, however, negatively impacted by high inflation, the depreciation of the local currency and increased power supply outages during the second half of the year.

The monetary policy interventions such as the increased interest rates, the introduction of gold coins and delays in government payments, temporarily halted the economic turbulence that was experienced during the year. The relative stability in inflation and exchange rates witnessed in the second half of 2022 has unwound in the first months of 2023, with the currency depreciating at a faster pace. The use of foreign currency for domestic transactions increased significantly during the year, spurred by the constrained Zimbabwe Dollar liquidity.

The official exchange rate depreciated by over 500% during the financial year, whilst we estimated year on year inflation at 206% as measured using the total consumption poverty line, which is a proxy for the Zimbabwe Dollar inflation indices.

Consumer spending continued to be buoyant, being boosted by stable US Dollar pricing, and modest improvements in wages and salaries across various sectors. There has been an increased informalisation of trade due to a number of issues such as the distorted pricing arising from use of multiple exchange rates, high IMTT tax, mandatory liquidations of foreign currency deposits and high bank charges.

South Africa has witnessed slower economic growth being impacted by power supply disruptions, high unemployment, exchange rate volatility, fuel price increases and elevated inflation levels. There are concerns about an anti-immigrant sentiment in some communities and the high incidence of violent crime.

Zambia's policy environment remains promising with significant international investor confidence in the country although consumer spending remains constrained. The firming of commodity prices will have a positive impact on the economy. The debt burden continues to be one of the biggest risks facing the Zambian economy together with the depreciating Kwacha. At the tail end of the year there was concern about the shortage of maize, which may impact the already fragile economy.

The global economies have been impacted by the pass-through effects arising from the supply chain disruptions in the aftermath of the COVID-19 pandemic and higher commodity costs brought about by the war between Russia and Ukraine. There are indications of currency instability and an imminent global recession.

# Trading Performance

# Lager Beer

Lager beer recorded improved volume performance throughout the year with a growth of 17% compared to prior year, achieving a record volume of 2.2 million hectolitres. The category benefitted from the injection of returnable glass bottles and the improved plant performance.

for the year ended 31 March 2023

#### Chairman's Letter to Shareholders (continued)

#### Trading Performance (continued)

#### Lager Beer (continued)

Packaging capacity remains limited, resulting in mismatches of demand and supply of brands and packs. The disruptions in the supply of non-returnable bottles and cans affecting the region are improving which will support one way convenience packs.

The business continues to focus on improving customer service and on increasing consumer facing activities. The installation of an additional packaging plant is progressing to schedule, for commissioning in June 2023 which will underwrite the supply of brands in line with market expectations.

#### Sorghum Bee

The sorghum beer volume in Zimbabwe grew by 9% for the year. The Chibuku Super supply was constrained by limited production capacity due to disruptions in the supply of power and water. The group also drove the revival of the Scud pack to enhance market supply and address affordability thus improving demand. A new Chibuku Super plant is being installed at the Harare Brewery which is scheduled for commissioning by June 2023. These investments will enable ongoing efforts to leverage on the available production capacity to cover the regional requirements as well as improve the supply of recently launched Chibuku Super Banana, which has excited the market.

The Chibuku brand celebrated its 60th anniversary during the year, which was highlighted by increased consumer engagements through music and sport activations.

United National Breweries South Africa recorded a volume growth of 12% over prior year, with slower growth recorded in the second half of the year. This was attributed to price distortions in the market driven by lack of pricing compliance by traders as a result of higher cost of fuel and distribution costs. Butterworths brewery, located in Eastern Cape province, was reopened during the year to address issues of product supply and the cost of distribution. The impact of the rampant power cuts impact production throughout the year.

Chibuku Super was successfully introduced into the South African market, through supplies from regional units. The commissioning of the Super Chibuku Plant in South Africa is expected by August 2023.

Natbrew Plc (Zambia) recorded encouraging volume recovery in second half of the year to close with a growth of 28% for the year. The recovery is driven by the returnable Scud pack and Chibuku Super Banana. The focus is on stabilising the supply chain and revamping the route to consumer to capture the improved consumer demand for our product. There is concern about the maize supply challenges and the impact of the currency depreciation on import costs.

#### **Sparkling Beverages**

The Sparkling beverages volume grew by 10% over the previous year and continued to recover market share despite the currency induced pricing distortions. The growth is anchored by the increased market penetration of the returnable glass packs and better availability of packs and flavours.

There were more pronounced product supply disruptions arising from power and water outages in the second half of the year. The supply of PET packs was constrained and is being addressed through the new plant which is scheduled for commissioning in May 2023. This will allow the supply of the full range of flavours and pack sizes.

#### Wines and Spirits

African Distillers (Afdis) recorded a volume growth of 18% for the year driven by the ciders ready to drink category, which grew by 23% and Wines, which grew by 16%. The volume growth was underpinned by the improved availability of locally produced brands and a revamped route to market which focused on direct store delivery. The business commissioned a new PET line and localised fermentation of ciders during the year.

The entity continues to receive technical support from partners Distell, which is now part of Heineken BV.

# Schweppes Holdings Africa

The volumes at Schweppes were flat for the year, having been affected by shortages of juice concentrates and a prolonged plant breakdown that disrupted the supply of Minute Maid branded juice drinks and bottled water. The currency related pricing distortions affecting formal outlets severely disrupted the route to market.

There was an improvement in the intake of juicing fruit during the 2022 season although the long-term supply positions are affected by the levels of exports of fresh fruit.

# Nampak Zimbabwe Limited

The volumes at Nampak Zimbabwe have been steady, riding on the recovery in the beverages and other consumer sectors. The focus remains on stabilising the supply of key imported materials that are affected by developments in the international commodities markets.

# Financial Performance

Group revenue increased by 60% to ZW\$537 billion in inflation adjusted terms, reflecting the volume gains across business units and the replacement cost-based pricing. Earnings before interest and tax (EBIT) grew by 29% to ZW\$99,79 billion which indicates the benefits of higher throughput and focused cost management.

In historic cost terms, the Group revenue grew by 423% to ZW\$452 billion compared to average inflation of 221%. Earnings before interest and tax (EBIT) grew by 371% to ZW\$102 billion, reflecting the higher volumes, inflationary stock holding gains and the realignment of cost structures as the economy dollarised. There were some significant increases in costs of fuel, imported raw materials and packaging, driven by the world markets which were impacted by geopolitical developments.

UNB South Africa recorded a near breakeven outturn whilst Natbrew Zambia posted a loss due to depressed volumes. The entities are expected to show an improved performance in the year to March 2024.

Zimbabwe maintained significant contributions in foreign currency takings and has been managing the value chain partners to utilise both currencies. The business has however experienced increased dollarisation of costs. Our business is susceptible to pricing arbitrage opportunities which due to exchange rate volatility impacts currency purchase decisions.

In order to provide users with a better insight into the underlying performance, the board estimates Group revenue at US\$712million, up 19% over the prior year, whilst EBIT is indicated at US\$140.6 million.

Users should note the inherent challenges of converting the financial statements into a stable currency given the disparate exchange rates prevailing in the country during the reporting periods.

The Group remains cash generative and has funded the on-going capital projects largely from own resources.

# Outlook

The election season in Zimbabwe is upon us and will dominate an operating environment that is faced with numerous economic challenges. We anticipate a continuation of the current policy environment anchored by multicurrency trading system with increased dollarisation. The economy will benefit from the improved 2023 agricultural season, the increase in mining activities and the election spending. The increased dollarisation of the economy may result in reduced volatility of inflation and the exchange rate, however there is a risk that increased dollarisation may lead to economic contraction.

There are significant complexities and uncertainties relating to the legislation on pricing, which are exacerbated by the ambiguous and the largely impractical taxation framework. There are also headwinds in the global economy, which are driving commodity pricing and supply disruptions, and the volatility of international financial markets.

Both Zambia and South Africa are facing some challenges although consumer spending is expected to grow, thereby creating opportunities for our entities to recover volume.

The focus remains on leveraging on the ongoing capacity investment projects to exploit any emerging growth opportunities. Aggregate demand will benefit from the recent policies on beneficiation of mineral ore before exportation, diaspora remittances and infrastructure projects.

#### **Advancing Our Sustainability Priorities**

The Group remains focused on its sustainability agenda, with increased activities in the areas of responsible alcohol consumption, reduction in waste and pollution, community involvement and optimising resource utilisation. In the current year we have amplified our communication on underage drinking under the Pledge 18 campaign, Make A Difference-Recycle executions and resumed the brand activations supporting sports and culture.

#### Dividend

The Board declared a final dividend (number 132) of US2.0 cents per share to be paid on 21 June 2023. This brings the total dividend for the year to US3.0 cents per share.

#### Appreciation

I wish to record my appreciation to management and staff for their great efforts in sustaining the business in the challenging operating environment. I also thank my fellow directors for their wise counsel and our customers, consumers, suppliers, regulators and stakeholders for their ongoing support.

#### For and on behalf of the Board

Chairman 12 May 2023
