Delta Beverages

SPARKLING BEVERAGES

ENVIRONMENTAL POLICY

As the leading manufacturer, distributor and marketer of high quality Sparkling, Maheu and SuperSip beverages, Delta Sparkling Beverages is committed to the effective implementation of Environmental management systems. The programs and systems shall be based on ISO 14001, EOSH (Environment, Occupational Safety & Health), National Occupational Safety Association (NOSA), Manufacturing Way and Route to Market requirements in all its operations.

Our approach to environmental management considers sustainability and social requirements, evolving scientific knowledge and community expectations. We are committed to achieving and sustaining high standards of environmental protection for our business operations through:

- Continual improvement in managing environmental issues by routinely identifying, eliminating and/or controlling environmental aspects and impacts in our operations.
- Complying with all applicable legislation and other requirements to which we subscribe to.
- Establishing objectives and targets and reviewing the environmental performance periodically to adequately protect the environment.
- Training our employees, contractors and visitors to make them knowledgeable about their responsibilities in sustainability and environmental protection.
- Prevention of environmental pollution, protection of biodiversity and ecosystems.
- Implementation of water stewardship, energy management and climate protection initiatives.
- Use of sustainable packaging and implementation of integrated waste management initiatives.

We are committed to communicating and making this policy available to our stakeholders, employees, contractors, visitors, customers, suppliers and other interested parties so that we are aware of our mutual obligations to protect the environment.

Workers' Committee Chairperson **SBs General Manager**

Revision No.3 **Date: March 2025**
